Astonfield teams up with Belectric

Astonfield Renewable Resources and Belectric have joined hands for the execution of Astonfield's 5MW solar power plant in Osiyan, Rajasthan. The project is expected to be approved under the Migration Phase of the Jawaharlal Nehru National Solar Mission. Belectric has completed site designs and engineering of the plant. Construction work is to begin after migration approval. In addition to plant design, construction and commissioning, Belectric will provide operations and maintenance (O&M) services for the plant. The Osiyan plant will be the first utility-scale solar power plant commissioned by Belectric under India's National Solar Mission.
